

CLEANCAIRE™

THROUGH KLEARZONE TECHNOLOGY

INDOOR ENVIRONMENTAL SOLUTIONS

Why CleanAIRe™?

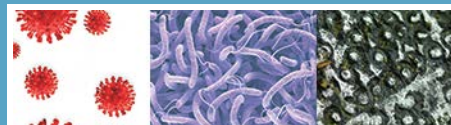

- Could you attract more customers if you offered a safer environment?
- How will you get people to come back into your business?
- Why should they choose your business?
- Do you want more customers than you had before?
- If your competitor had something better than you, could you afford to lose customers?

The CleanAIRe™ program gives consumers and employees the confidence that you care enough about their health to continuously disinfect the air they breathe with Klearzone™ technology.

State-of-the-Art Klearzone™ technology continuously disinfects and purifies air inside your business:

Allergens

Viruses, Bacteria and Fungi

Odors

You know it's working because odors are gone.

Why Klearzone™ Technology?

Confidence

Clients and employees feel safe to go back to work and travel

Safety

Safe, self-contained ozone treatment for the health of employees and guests

24/7 Protection

Lower risk of respiratory infections from COVID virus, influenza and bacteria

State-of-the-Art

Dual ozone and catalytic action to assure complete pathogen destruction

Easy-to-Use

Simply plug it into a power outlet and turn it on

Cost Efficient

No HEPA filters, charcoal filters or UV lamps to buy and replace

Flexible

Portable for spot treatment, wall or ceiling mounted

Whisper Quiet

Nearly silent operation (51.2 dB at 7 ft. (2M))

Multi-Functional

Remote operation for non-chemical, broad-spectrum area disinfection

Chemical Free

Eliminates airborne odors so you always know the Klearzone™ system is working

Unlike systems using filtration, Klearzone™ technology uses a combination of high dose ozone and catalytic action to completely destroy pathogens emitting particle free H₂O, CO₂ and O₂.

The added benefit of Klearzone™ technology is its broad-spectrum high dose ozone disinfection capability to treat both airborne and surface bound pathogens, as portable or permanently installed systems.

The Applications are endless with **CLEANCAIRE™**
Creative Innovative Technology
Minimizing Risk by Saturation of High Traffic Areas

Airports

Portable / Mountable / Removes Odors

Developed to destroy airborne viruses and microorganisms, especially **COVID-19, Influenza & Tuberculosis**

Patent Pending

Medical Industry Standard Critical Technology used for sterilizing has been integrated in an innovative solution to allow individuals to be in the room while device is running. This isn't a HEPA Filter or UV technology, it's Klearzone™, which destroys pathogens on contact using ozone and catalytic processes.
